SYSTEM FOR DYNAMIC PROCESS ASSIGNMENT
IN A LOCAL AREA NETWORK AND METHOD THEREFOR

ABSTRACT OF THE DISCLOSURE

5   A system (10) for dynamic process assignment among a plurality of
devices (40) includes an initial coordinator (38), a requesting device (60), and
a resource device (62). The initial coordinator (38) includes a list of available
resources (56) for each device of the plurality of devices (40). The requesting
device (60) requests the use of a desired resource. In response to the request
10   from the requesting device (60), the initial coordinator (38) identifies an
available resource associated with one of the plurality of devices (40) for use
by the requesting device (60) as the desired resource.
